

HygroPro

Aluminum Oxide Moisture Transmitter

Applications

This aluminum oxide moisture transmitter measures moisture concentration in gases and non-aqueous liquids from trace to ambient levels. It is suitable for a wide range of industries:

- Petrochemical
- Natural gas
- Industrial gas
- Semiconductor
- Furnace gas/heat treating
- Power generation
- Air dryer
- Pharmaceutical
- Aerospace

Features

- Intrinsically safe
- Ambient to ppb moisture measurement; using aluminum oxide moisture sensor
- Built-in temperature and pressure sensors
- Non-volatile calibration data storage
- Calibrations traceable to National Institute of Standards and Technology (NIST)
- Requires only twisted pair cabling
- Complete program capability via six-button keypad
- Integrated display/user interface
- Analog and digital outputs

The HygroPro moisture transmitter is an intrinsically safe, compact, loop-powered moisture transmitter designed specifically to meet the demands of rugged industrial applications. With certified intrinsically safe electronics (when installed with proper protection) packaged in an IP67/Type 4X housing, the HygroPro is ideal for use in pipeline natural gas, petrochemical, power generation and other industrial gas or non-aqueous liquid applications.

The HygroPro features an integrated backlit display and six-button keypad to provide viewing of up to three parameters simultaneously and to allow easy navigation of the software for configuration of the display, analog and digital (RS485) outputs, and other user functions and diagnostics. Via the RS485 interface, the HygroPro built-in multidrop capability allow multiple units to be connected on a single network.

Using an industry-proven aluminum oxide moisture sensor, the HygroPro features a built-in temperature thermistor and pressure transducer to provide real time measurement for calculation of parameters such as ppmv in gases, ppmw in liquids, pounds per million standard cubic feet in natural gas or percent relative humidity. Three sensors mounted on a single probe mount provide installation flexibility when space is limited. In addition, the HygroPro display can be oriented in four different orientations to allow installation of the moisture sensor in the top, bottom or side of a process pipe or sample cell.

The HygroPro consists of a display/keypad housing, and a replacement transducer element (RTE), which contains the aluminum oxide moisture sensor, temperature thermistor, and pressure transducer and associated electronics. The RTE is field replaceable by simply removing a small mounting plate and disconnecting a cable. Also, since the calibration data for the moisture and pressure sensors are stored in a non-volatile EEPROM in the RTE, a user does not need to enter any calibration data manually when changing an RTE.

Advanced moisture sensor technology

The HygroPro combines a technologically advanced aluminum oxide moisture sensor with state-of-the-art software and electronics for unequaled overall performance.

NIST-traceable calibration

Superior sensitivity, speed of response, calibration stability, and wide dynamic range have made Panametrics aluminum oxide moisture probes the standard of performance and value in industrial moisture measurement. They are suitable for laboratory and industrial moisture measurement applications in gases and non-aqueous liquids over a wide range of process conditions.

All moisture probe calibrations are traceable to the NIST.

The rugged, compact HygroPro transmitter is designed specifically for installations where space is at a premium. It can be installed directly in the process stream or, if necessary, in a sample system. If required, GE can design and build a sample conditioning system to meet unique application demands.

Standard analog output connection

HygroPro specifications

Calibration ranges (dew/frost point)

Standard: 50 to -112°F (+10 to -80°C) with data from +68 to -166°F (+20 to -110°C)

Operating temperature

-4°F to 140°F (-20°C to 60°C)

Storage temperature

158°F (70°C) maximum

Accuracy

- ±3.6°F (±2°C) above -148°F (-100°C)
- ±5.4°F (±3°C) below -148°F (-100°C)

Repeatability

- ±0.4°F (±0.2°C) above -148°F (-100°C)
- ±0.9°F (±0.5°C) below -148°F (-100°C)

Electrical

Power

- Voltage: 12 to 30 VDC (loop-powered, customer supplied)
- Output: 4 to 20 mA analog, RS485 digital
- Output Resolution: 0.01 mA/12 bits
- Load: Max R = (PSV x 33.33) - 300
Example: (24 x 33.33) - 300 = 500 W
- Cable: 6 ft (2 m), standard (consult factory for custom lengths); cable includes molded weatherproof connector with flying leads

Display

- 128 x 64 LED backlit LCD
- Display from one to three parameters and diagnostics

Mechanical

Sample connection

- 3/4-16 in. (19 mm) straight male thread with O-ring
- G 1/2 with optional adapter

Operating pressure

5 mHg to 5000 psig (345 bar)

Enclosure

Type 4X/IP67

Dimensions

- H x W x D: 7.88 x 3.99 x 2.56 in. (200 x 101 x 65 mm)
- Weight: 1.2 lb (550 g)

European compliance

Complies with EMC directive 2014/30/EU

Hazardous area certification

- C-US Class I, Division 1, Groups A,B,C&D, Type 4X
- EX II 1 G EEx ia IIC T4 (ATEX)
- Ex ia IIC T4 (IEC Ex)

Moisture sensor

Sensor Type

Thin-film aluminum oxide moisture sensor

Calibration

Each sensor is individually computer-calibrated against known moisture concentrations, traceable to NIST

Calibration interval

Sensor recalibration by Panametrics is recommended every six to twelve months depending on application

Flow rate

Gases: Static to 100 m/s linear velocity at 1 atm

Temperature sensor

Sensor Type

NTC thermistor

Operating range

-22°F to 158°F (-30°C to 70°C)

Accuracy

±0.9°F (±0.5°C) overall

Response time (maximum)

One second in well stirred oil or 10 seconds in still air for a 63% step change in increasing or decreasing temperature

Built-In Pressure sensor

Sensor type

Solid state/piezoresistive

Available Ranges

- 30 to 300 psig (3 to 21 bar)
- 50 to 500 psig (4 to 35 bar)
- 100 to 1000 psig (7 to 69 bar)
- 300 to 3000 psig (21 to 207 bar)
- 500 to 5000 psig (35 to 345 bar)

Accuracy

±1% of full scale (FS)

Pressure rating

Three times the span of the specified range to a maximum of 7500 psig (518 bar)

HygroPro dimensions
